TOWARDS ZERO MAINTENANCE

# Overhauling of the Tamping Units

BOOSTING THE PERFORMANCE AND PRODUCTIVITY OF YOUR TAMPING MACHINES

The full overhauling is carried out in complete compliance with the manufactures instructions related to the overhaul requirements of such unit. All functions of the aggregates are in accordance with the technical /functional specifications of the OEM.

The overhauling is performed according a program, which is described in detail in the manual book. The manual book shows the work tasks and objectives, which are inspected. Also the parts, which are replaced /repaired are listed including the methods, rejection limits, documetation, inspection memos etc. The manual is fully equal to the OEM one.

All necessary tests will be carried out in order to verify a well-functioning tamping aggregate. The guaranty period is one operational season.
