

Install and forGET

TOWARDS ZERO MAINTENANCE

TUNGSTEN CARBIDE PROOFED WEAR PART SOLUTIONS

The performance of **Install and forGET** wear parts are based on solid tungsten carbide wearproofing against extreme abrasion and high impact situations.

The customized **Install and forGET** wear parts last up to 10x longer than their existing OEM counterparts.

Solid Tungsten Carbide Wearproofed Customized Parts for Bulk Handling and Processing Equipment.

Up to 10x longer performance

Technology

The outstanding performance of Install and forGET wear parts are based on utilizing the innovative technology of attaching solid tungsten carbide tiles by a process of induction brazing.

Install and forGET benefits

Numerous applications have shown that parts which have required frequent servicing will last up to 10x longer. This translates into less down time, spare parts inventory and change-out labour costs as well as greater safety and efficiency.

Comparing materials

Materials tested in high impact and abrasion situation.

RUBBER WHEEL ABRASION TEST CARRIED OUT ACCORDING THE STANDARD ASTM G-65.

Install and forGET

HL-Industrial specializes in designing and supplying tungsten carbide protected wear parts for industrial equipment. These **Install and forGET** custom-made wear part solutions last up to 10 times longer than traditional wear materials.

This rush statement has been proved by leading companies among bulk process industry all over Northern Europa. The expertise is based on utilizing the innovative technology of attaching solid tungsten carbide tiles by a process of brazing, already since 1964.

Wide range of wear parts for the bulk processing industries

HL-Industrial offers **Install and forGET** solutions for maintenance-free operations of processing **bulk materials**, such as: sand, ballast, quarry, clay, cement, asphalt, glass, limestone, minerals, coal, ash, timber, woodchips, bark, peat, coal, waste materials, etc.

These unique **Install and forGET** wear parts are always customized to fit and replace the current standard design. Solid tungsten carbide wear proofed parts provide a long lasting proof for applications in **processes**, such as: mixing, conveying, feeding, gliding, separation, grinding, shredding, crushing, gripping, lining, ploughing, tamping, etc.

The **Install and forGET** solutions have been providing maintenance-free operations for several branches of **industries**, such as: concrete, cement and asphalt plants, foundries, saw and pulp mills, energy and waste disposal plants, mining and mineral industry, processing industry, etc.

HL-Industrial

HL-Industrial has the expertise to address the toughest wearproofing issues in bulk handling and processing equipment. HL-Industrial provides:

- Free of charge advice without obligation
- Designing the **Install and forGET** parts to fit into the current applications
- Manufacturing and supplying the ready-to-use parts
- Cost effective logistics and delivery of ready-to-use parts

INSTALL AND FORGET WEAR PARTS FOR EFFICIENT BULK PROCESSING

HL-Industrial provides innovative and outstanding solutions against hard abrasive wear, corrosion and impact situations for the bulk processing equipment. The wide range of **Install and forGET** parts cover a large frame of references:

Branches of industries

- Foundries
- Pulp and Saw Mills
- Mining and Mineral Industry
- Concrete, Cement, Brick and Asphalt Factories
- Energy and Waste Disposal Plants
- Railroad Track Machinery
- Process Industry

Applications

- Mixing Paddles, Wings, Blades and Scrapers
- Screw Conveyors, Augers and Centrifuges
- Shredder Knives
- Grinding Blades and Crushing Hammers
- Wear, Lining, Gripping and Sliding Plates
- Feeders, Hoppers and Chutes
- Fan Blades

Clientele

- Production and Maintenance Staff of Plants
- Contractors
- Original Equipment Manufacturers
- Maintenance Service Companies

Market area

- European Union
- Russia
- Norway

TOWARDS ZERO MAINTENANCE

Install and forGET

TOWARDS ZERO MAINTENANCE

Farewell to Frequent Repairs

Customized **Install and forGET** Solutions eliminate the need of frequent repairs. **Install and forGET** wear parts offer an outstanding performance and durability for low-life cycle costs. Long-Life **Install and forGET** wear parts:

- Increase the time between repair cycles dramatically
- Reduce the expensive downtime significantly
- Reduce the spare part inventory
- Enable maintenance teams to focus on prior issues
- Increase the efficiency and boost the productivity
- Provide a higher quality production
- Provide a greater safety and preserve the environment

Install and forGET wear part give the best combination of durability, performance and value.

HL-Industrial

HL-Industrial has the expertise to address the toughest wearproofing issues in bulk handling and processing equipment. The aim of HL-Industrial is always to convert the traditional standard wear part to a maintenance free and flexible resource for the end user. HL-Industrial provides:

- Free of charge advice without obligation
- Designing the **Install and forGET** parts to fit into the current applications
- Manufacturing and supplying the ready to use parts
- Cost effective logistics and delivery of ready to use parts
